You've seen the Heir fight twice before now, and you're ready for him. As before, his arm reaches out for your neck, but you knock it aside and push him—slightly—off-balance. But not off-balance enough, as he jumps back out of your range before you can attack.

You charge, swinging your fist, only for him to catch it in his hand. His other hand goes to your neck.

"You're just a pathetically weak little girl, aren't you? Don't worry, though. I won't hurt you. I'll just push...."

And back he pushes you. You try to struggle free, but he's too strong. You can't get out of his grip. Slowly but surely, you find yourself forced back towards the edge.

- Resist him.
- Talk to him.
- Out-think him.
- Just give up.

This is freaking stupid.

Half the text boxes from NPCs don't even properly appear so I don't even know what to do or what the story is, the combat is just unfun, text can go off-screen so you can't even see the entire message (this made the tutorial harder than it needed to be), you can't change directions while in midair so you'll overshoot way too many jumps (DID THESE PEOPLE NEVER PLAY SUPER MARIO!?).

I'm fairly certain this game only got "mostly positive" because it's playerbase is a buncha furrries who wanna screw the characters.. GAME: The best Trump-voter simulator ever made. Grab a copy, some moonshine, your MAKE 'MURICA GREAT AGAIN cap, your cousins ♥♥♥ and get ready for some killbilly action. Rating: 10/10 braincells.

PORT: This Steam port is beyond broken. No addons, graphics flashing, can't change controls, no original music. This is totally lazy. Worth .99c not \$9.99. Avoid. Rating: 01/10 dead racoons

. tripping ballz simulator 2016. Easy-to-use tools make for a much faster workflow than the traditional brute-force method of doing things. Gone are the days of manually rigging skeletal animation in Flash and exporting it frame-by-frame--this is the way of the future.

The interface is a little overwhelming at first but this only stands as testament to the program's power. If you can navigate Photoshop or a recent version of Blender, you can probably grasp this tool very quickly.. Such a bad "game," if you want to call it that. Awful graphics, poor grammar, unfair and repetitive gameplay, annoying music and sounds... the list goes on. I also don't know what kind of physics engine was used, but it sure as hell wasn't a racing one. You slide all over the place if you try to drift, or even if you're going too fast, and you will continue to spin around and around. The AI is also broken, as they can go straight through the traffic without being phased. This is a cheap pile of ♥♥♥♥♥♥ I mean cheaply put together, as the game itself is \$20... this is criminal and needs to be taken off steam.. Too much fun, Worth every penny! brings it back to true SNES gameplay and done quite well. Multiplayer is still in Alpha and there are a few bugs but they should be fixed over time. Also a ton of fun with friends!. The games good, great to play with friends. trippy as hell 10/10

This puzzle game is a cute, casual timewaster that I'd rather play on a mobile device than a computer. The learning curve is also sharp - the tutorial levers are beyond obvious, but the first real level had me truly stumped on how to get a perfect for 5 minutes. If you enjoy cute puzzles, pick it up in sale. I got it 50% off but still feel like I overpaid. It is satisfying to crunch the robots though.. Played this on Twitch <https://youtu.be/LyqGTzWwMWM>

Gun shooting with nice graphic & good concept of old man telling story.
I particularly liked the storytelling-ish expansion of stories and weapons.

However, I found some parts a little bit dull while playing, which felt like being put for extending playtime.

I could deflect the bullets with guns, which was cool, though it would be much better with various elements on shooting scene. :)

** Graphic (VR) 4/5

** Sound 4/5

** Story 3/5

** Action 4/5

** Overall : If you are looking for the VR shooting game, I recommend this one! It's worth buying and playing :)

Amassed around 10k monies, I went and bought the best soldiers bread money could buy. You see 160 mechanized soldiers encircling the thousands of goblins and skeletons marching toward this bustling little town that I baked bread in.

Let's just say lasers could win over anything anyway :nippy:. Out of all the TS add-ons at present this is the one most definitely worth it.
